Any other particulars for improving the quality of the environment.

- Forming pits, retaining tanks and bunds in the mining area, improve water resources. Water harvesting pits were dug in the adjoining area.
- For noise pollution control & ground vibration Non electric delay detonators are used. Greenbelt is developed along the boundary of mine area for reducing the impact of noise due to mining activity on the surrounding Environment.
- Regular water sprinkling is done at mine face and haulage roads to suppress dust.
- Conservation of resources is done as per the approved mining plan.
- In Devapur Limestone Mine, so far total plantation of 43725 saplings was carried out covering an area of 36.583 ha. In the year 2022-23 as per mining plan we have planned to plant 1600 nos. of saplings in 1.6 ha area. Year wise plantation details:
